## Vienna Insurance Group reporting systems to use SAP Business Objects

### New business intelligence software replaces MicroStrategy

The **Vienna Insurance Group AG Wiener Versicherung Gruppe** (VIG) is set to implement SAP's Business Objects software for its reporting procedures with immediate effect. The new business intelligence tool enables systematic data collection, evaluation and presentation. SAP Business Objects integrates seamlessly with SAP Business Warehouse, which was introduced at VIG and at many Group companies several years ago as part of the VIG SAP Smile programme. The MicroStrategy system currently in place will no longer be used as a Group-wide solution.

The move to SAP Business Objects will simplify data exchange between VIG's controlling departments and the Group companies. Ultimately a central database will store all of the key data from the 50 or so Group companies in the 24 countries where the Vienna Insurance Group is represented. The changeover represents a significant step towards harmonising VIG's internal reporting structures.

**Vienna Insurance Group** (VIG) is the leading insurance specialist in Austria as well as in Central and Eastern Europe. About 50 companies in 24 countries form a Group with a long-standing tradition, strong brands and close customer relations. VIG looks back on almost 190 years of experience in the insurance business. With about 23,000 employees, Vienna Insurance Group is the clear market leader in its core markets. It is therefore excellently positioned to take advantage of the long-term growth opportunities in a region with 180 million people. The listed Vienna Insurance Group is the best-rated company of ATX, the leading index of Vienna Stock Exchange; its share is also listed on the Prague Stock Exchange.
